Sunnyvale, California

TITLE	<i>Illuvium</i>
LOCATION	Moffett Place, Sunnyvale, CA
DESCRIPTION	The Moffett Place public art plan is composed of a series of landscape sculptures that comprise the six entry plazas for Google's campus in Sunnyvale, CA. The focal component of each plaza is an elegant bronze fountain, in an S form or Z variant, resting on a granite pedestal that corresponds in shape. A circular ripple pattern, similar to the effect of dropping a pebble into water, emanates from the center of each fountain extending into a series of concentric rings in the paving and seating area surrounding each fountain. Benches are made from recycled cast concrete conforming to the curves of the plaza paving. Their scalloped relief is echoed in the bronze fountain, bronze landscape screens and a luminaire that frame each plaza. The surrounding landscape is lushly planted with grasses. Grasses are planted in layers ringing the site and layer in front and behind the bronze screens to create images where landscape is confounded with sculpture. Sculpture and landscape work in support of a single image that becomes a point of delight at the entry of each of the six campus buildings.
DATE	2015
MEDIUM	Cast Bronze Fountain, Concrete Benches, Laser Cut Stainless and Bronze sheet, LED Light
DIMENSIONS	6 Entry Plazas, each approximately 3,000 sq feet with a 150 sq feet fountain.
COMMISSIONED BY	Jay Paul Company
ENGINEER	Patrell Engineering, Glendora, CA
GENERAL CONTRACTOR	Level-10
SUBCONTRACTORS	Metal Arts Foundry, Lehi, UT
