

Image number:

Charlotte, North Carolina

TITLE	<i>Stitches</i> , South Corridor Infrastructure Sculpture
LOCATION	Sharon Rd. West and South Boulevard, Charlotte, North Carolina
DESCRIPTION	The <i>Stitches</i> sculptures are part of the South Corridor Infrastructure Sculpture project. These two pieces mark the entrance to the light rail transit stop. Each sculpture is 16' tall, approximately 30" in diameter at the widest point, and fabricated from bent and welded stainless steel rods, 1/2" and 1" in diameter. The sculptures are illuminated from the inside with an HID uplight, as well as by three in-ground fixtures located around the base. The articulated stainless rods catch and reflect the light in the day and change again when illuminated at night.
DATE	2007
MEDIUM	Formed stainless steel rods, HID light
DIMENSIONS	H16' x 30" (expanded and tapered from bottom to top)
