

Project Data Sheet

San Francisco, California

Title Ethereal Bodies 8

Location Zuckerberg General Hospital and Trauma Center, San Francisco, California

Description Ethereal Bodies 8 creates a dynamic pivot point, activating the south hospital entrance by mediating arrivals and departures. The ensemble of sculptures is positioned on a contoured earthwork planted with grasses. The stainless-steel rods gather sunlight by day and interact with the program of LED lights that illuminate the sculptures by night when activated through motion sensors. The sculptures' anthropomorphic quality is complemented by their lightness and open structure. Given this transparency of the forms, the sculptures offer a cinematic quality as they recombine upon the viewer's changing position when viewed from a vehicle circling the entry drive. Ethereal Bodies 8 is part of a series of sculptures the artist began with Sentient Beings, in North Hollywood, CA in 2008.

Date 2015

Medium Stainless Steel Rods, LED Lights

Dimensions 8 Parts, 21'-8" H x 19' W x 15' D overall

Commissioned by San Francisco Arts Commission

Engineer Patrell Engineering Group, Inc., Glendora, CA
Burro Happold Engineering, Los Angeles, CA

General Contractor WebCor Builders

Subcontractor Metal Arts Foundry, Lehi, UT
